Report from active participation in AACR Annual Meeting, Philadelphia, April 18-22nd, 2015

The AACR Annual Meeting 2015 was held in Philadelphia, Pennsylvania, USA. It is the biggest American cancer research meeting that highlights the latest, most exciting discoveries in every area of cancer research. The general subject of the meeting this year was “Bringing Cancer Discoveries to Patients” and this subject covered also most exciting recent discoveries related to immunotherapy.

Beata Pyrzynska presented the poster during the late-breaking poster session related to “Experimental and Molecular Therapeutics” on Tuesday, April 21st. The poster was entitled: “PTEN regulates the CD20 antigen expression and affects rituximab-based therapy of lymphoma malignancies”, number LB-242/4; authors: Beata Pyrzynska, Kamil Bojarczuk, Marta Siernicka, Michal Dwojak, Malgorzata Bobrowicz, Nina Miazek, Piotr Zapala, Agnieszka Zagozdzon, Jakub Golab, Magdalena Winiarska.

Late-Breaking Poster Session

LBPO.ET02. Late-Breaking Research: Experimental and Molecular Therapeutics 2
Tue, Apr 21, 1:00 - 5:00 PM
