**Report on Nordic IHC Basic Course participation
of Dr. Radoslaw Zagodzón within the 7PR21/BASTION/WP2**

On the 21st and 22nd of January 2015, Dr. Radoslaw Zagodzón participated in the Nordic Immunohistochemistry Basic Course organized in DAKO's Glostrup/Kopenhagen facility in Denmark.

The course was dedicated to scientists having basic experience within the field of immunohistochemistry as a laboratory technician, pathologist, cytologist or researcher and willing to improve their theoretical and technical skills.

The IHC Basic Course completion certificate

The course contained an introduction to the field of immunohistochemistry. It also provided the knowledge concerning basic histology in relation to immunohistochemistry, tissue-preparation, pre-treatment procedures, primary antibodies, detection technologies and staining automation. An important part of the course was the description of basic troubleshooting, exemplified by typical pitfalls. The course also contained a tour to the antibody manufacturing and immunohistochemistry staining-related facilities of the DAKO company.

The knowledge gathered during the course will be used for more efficient organization of the digital imaging facility supervised by Dr. Zagodzón within the Department of Immunology, Warsaw Medical University.
